The Hamburg Institute of International Economics (HWWI) has drafted a new market analysis on offshore wind energy and decommissioning

Official Press Release HWWI:

HWWI drafts a new study on offshore wind energy and decommissioning

Europe can set the global standard for decommissioning / Great opportunities for Northern Germany and Hamburg through recycling of offshore wind turbines / Challenges are to be tackled soon

The Hamburg Institute of International Economics (HWWI) has drafted a new market analysis on offshore wind energy and decommissioning in the scope of the INTERREG-North Sea project „DECOM Tools". Against the background that offshore wind energy still comprises a high growth potential Europe has the chance to set the global standard when it comes to decommissioning of facilities at the end of their lifespan. Particularly Northern Germany can benefit from great opportunities – as long as the according challenges are solved soon. Most of the offshore wind energy... ...
