

# Inland Waterway Transport Solutions

Mobilising potentials and capacity  
to move freight to smaller waterways

Interreg  
North Sea Region  
#IWTS 2.0  
European Regional Development Fund

Inland Waterway Transport (IWT) offers relatively slow, cheap, climate friendly hinterland transport alternatives for commodities transported in large quantities or bulk. The energy input per t/km is superior to rail, road transport. Many waterways in Europe remain widely un-/underused in the past decades.

Total budget € 3.462.734

ERDF contribution € 1.731.368
