

Stimulating Hydrogen Fuelled Transport Solutions

The Hydrogen Transport Economy (HyTrEc) 2 project is part of the Interreg VB North Sea Region Programme and is partly funded by the European Regional Development Fund.

Total budget: 5,246,271 € ERDF Contribution: 2,197,940 €

For
Business

For the
Environment

For the
Future

Developing the
Fuel Cell Vehicle market
and promoting the North
Sea Region as a Centre of
Excellence for fuel cells and
range extenders.

Developing
innovative methods for
the production, storage
and distribution of
hydrogen.

Implementing innovative
hydrogen transportation
solutions involving vans,
large trucks and refuse
collection vehicles.

Improving the supply
chain and training.
