

Stimulating Green Hydrogen Fuelled Transport Solutions

The Hydrogen Transport Economy (HyTrEc) 2 project is part of the Interreg VB North Sea Region Programme and is partly funded by the European Regional Development Fund. Total budget: € 5,246,271 ERDF Contribution: € 2,197,940 Project length: 5 years.

Developing the Fuel Cell Vehicle market and promoting the North Sea Region as a Centre of Excellence for fuel cells and range extenders.

For Business

For the Environment

For the Future

Developing innovative methods for the production, storage and distribution of green hydrogen.

Implementing innovative green hydrogen transportation solutions involving vans, large trucks and refuse collection vehicles.

Improving the supply chain and training.
