To rate, click on the "Rate" tab via the top navigation menu and slide the control bars with your cursor to rate the idea. Use the comment section on the right-hand side to comment about why you evaluated the idea as you did. The spider chart on the left-hand side shows your rating and the rating of the user crowd. After you have rated the opportunity and left a comment, clicking the small triangle next the current idea's title at the top will take you to the next business opportunity.

5) Create a piece of information

An Information in the FSC is a qualitative fact from news articles, interviews, studies, research papers, or other valuable sources available to you. An Information contains a title, a short description and if possible a source and a picture.

To create a new piece of information, choose the information tab on the dashboard and click on the plus sign.

Examples for a piece of information: Articles from journals, the internet or even own conference documents can be used as information. If the entity is created, it is necessary that the information is actually present in the created information (e.g., by attaching a file)

When filling the form for creating an information, please remember that all fields marked with a star (*) symbol are required and must be filled in accordingly. All other fields are optional. You also have the option to switch the information via the control bar to private so that the information can only be seen by yourself, but not from any other user. However, please keep in mind that this means any arguments which are based on that piece of information are hard to understand for others.

Add tag	
Add attachment	
Drop files here or click to upload	

When you create a piece of information you can add additional data as an attachment, such as an URL, a description or even files and pictures. Furthermore, it is possible to link the information immediately with other entities in the FSC (through tags). Thus, a piece of information can be linked to an idea (business opportunity). All Information and ideas are automatically linked with each other when you use the same tags.

6) Use the browser add-on to create a piece of information

There is a browser Add-on available for the FSC that can be used for scouting information. It allows you to search and create a piece of information directly from websites, i.e. news sites, magazines. The Add-on can be downloaded in the corresponding expansion portals:

Add-on in the Chrome Web Store Add-on for Firefox Extensions

Using the Add-on

- Log in to the FSC.
- Surf via your internet browser (Firefox or Chrome) as usual. If you find a relevant article you want to import into a FSC topic, select a text session you want to highlight and use your right-mouse click to "highlight text". Continuing with the text until you highlighted all important text passages.
- First, choose the topic where you want to add the new information (here "Periscope Business Opportunity")
- The highlighted text will automatically appear in the description.
- If the article contains any pictures, the Add-on may let you select your favorite picture to import.
- Add other relevant details and link if possible the piece of information to an existing idea via the 'links' tab
- Click on Save to import the article and wait until the Addon creates a screenshot and imports the information)

7) Link a piece of information to an idea via drag and drop

On the dashboard you can link a piece of information to any idea via drag and drop by accessing the dots in front of each information listed. Wait until the cursor turns into a cross, click and drag the information to the relevant idea. You can also link one idea to another using the same procedure.
