## NEWSLETTER

### Dear reader,

This is the December Issue of the newsletter from the DecomTools project, a EU project funded by the European Union's [Interreg North Sea Programme](#).

#### Market analysis and partner meeting in Grenaa

In this newsletter you can read about a new market analysis from the project, a DecomTools workshop in Belgium – and you can watch video with the project partners that took part in the DecomTools partner meeting at Grenaa, Denmark in September 2019.

Merry Christmas and Happy New Year!

### Market analysis: Decommissioning offshore wind is an overall opportunity

“Europe will set the agenda worldwide for decommissioning of offshore wind”.

A new market analysis from the Interreg North Sea project DecomTools highlights the potential of the afterlife of offshore wind farms.

## **DecomTools Video: Testimonials from the project partners**

The third partner meeting in the DecomTools project took place in September 2019 at the Port of Grenaa in Denmark.

Port of Grenaa, Hochschule Emden/Leer - University of Applied Sciences, Virol and HVL-Haugesund present their work with decommissioning of offshore wind in these short video testimonials.

**TESTIMONIALS**

## **Belgium puts offshore wind turbine decommissioning high on the agenda**

[Subscribe](#)[Past Issues](#)[Translate ▼](#)

- will also be part of the pioneers in the decommissioning of the onshore wind turbines.

To that end, the regional development agency POM West-Flanders and the Port of Oostende supported by Sirris brought together companies and organisations in an interactive workshop to discuss all aspects concerning the decommissioning of the offshore wind turbines.
