

### Invitation to WAVE/HYDROGEN/HEAT Workshop in Hvide Sande

The DUAL Ports project and the Port of Hvide Sande have the pleasure of inviting you to our WAVE/HYDROGEN/HEAT Workshop on December 9 to December 10, 2019, in Hvide Sande, Denmark.

The workshop will focus on the possibilities of using wave, hydrogen and heat as energy sources and you have the opportunity to hear our speakers share their experiences of the technologies. You will also have the chance to join us for a visit at Port of Hvide Sande and see its progress firsthand.

#### Registration:

If you wish to register for the workshop, please do so by email to the Communication Officer Josephine Petersen, Vordingborg Erhverv, at [jp@vordingborgerhverv.dk](mailto:jp@vordingborgerhverv.dk).

#### Programme:

[You can see the full preliminary programme here](#)

The attached programme is a draft and therefore changes may occur.

We look forward to seeing you!

### All ports of Niedersachsen Ports got PERS certified

The PERS certificate from EcoPorts is an environmental initiative of the European Seaport Organization (ESPO). Niedersachsen Ports has been evaluated by a special standard for ports, the Port Environmental Review System, which examines the social and environmental impact of port activities.

"We have decided that we want to be judged against the European standards of EcoPorts with our environmental management and our activities. This certificate confirms our sustainable course. We are pleased about this as it is a confirmation of our work for the coastal region," explains Holger Banik, Managing Director of Niedersachsen Ports GmbH & Co. KG and JadeWeser-Port Realisierungs GmbH & Co. KG who is joined by the Minister of Economic Affairs of Lower Saxony Dr. Bernd Althusmann in the picture.
