

NAME

PZ Thomas

Goals

1. Save the climate: Thomas wants to do all he can afford, to save the environment, to realize lower Green House Gas emissions.

2. Save energy: Thomas hopes that he can improve his insulation and energy efficiency plus switch to renewable energy sources without paying more.

3. Learning: Thomas wants to learn from renovating his own home: the skills he learns and his experience are relevant to his work as a plumber.

His 122 square meter residence in Tovrup is:

- pioneering in energy-efficiency

• warm and cosy all year round

• the heating bill comes to a paltry DKK 200 per month

Quote

“
*I did all the work myself, so it wasn't so expensive.
For a non-craftsman, such a unit will cost about DKK 200,000, and I really think it could pay off as an alter- native to an oil burner*
”

Demographic

_____ years

Background

Thomas is a hard working plumber and passionate Do-It-Yourself-er.

Motivations

Thomas has had a special mania for thermal bridges. He found every single one using a thermal camera, and wants to shut them down so that there is no cold leaking in anywhere.
