#Sustainability in progress!

Last week, **#AUFOOD** offered the PhD course: Applied Methods in Crop Physiology. **#Vegetables**, **#peatfree** growing media and **#nitrogen** use efficiency were in focus during the last two days of lectures.

Scientists **Thayna Mendanha** and **Mesfin T. Gebremikael** were happy to present their current research on alternative growing media and **#compost** application effect on soil biology to the PhD students.

#Comcrop #BioGrowth #SoilCom
